### BROADLY ADAPTED GENETICS WITH HIGH YIELD POTENTIAL

- Strong emergence and early vigor for a fast start
- Fast drydown for an early harvest
- Excellent performance in highly productive soils

### Performance By...

E085A3 has consistent performance across all soil textures but performs best on highly productive, intensively managed acres. A semi-flex ear allows for a wide range of populations; however, best performance is around 34,000 plants/A. E085A3 is a very good choice for any crop rotation.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
