

## E109R3

RM:  
109

### HIGH-YIELDING GENETICS THAT PERFORM ON YOUR BEST ACRES

- Outstanding stalk strength with a strong disease package
- Well adapted in and north of zone
- Best performance at medium to high plant populations

### Performance By...

E109R3 excels on medium- and fine-texture soils. Because of a semi-determinate ear type, E109R3 performs best at above average plant populations (34,000 and greater). E109R3 will perform well in any cropping rotation.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
