BROADLY ADAPTED PRODUCT WITH STRONG DROUGHT TOLERANCE

- Strong stalks and late-season plant health provide very good harvestability
- Solid agronomic characteristics for consistent performance
- Very good dual purpose hybrid

Performance By...

G98L17 performs extremely well across all soil textures, including stress acres. Performance is best at grower-standard planting populations (31,000-34,000 plants/A). G98L17 is an excellent choice for continuous corn and rotated acres.

Published June 15, 2017. For use until July 01, 2018.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
